

Vitor Silvestre – Tech Game Designer

Location: Brasília, Brazil

Email: notrealvitor@gmail.com | **LinkedIn:** www.linkedin.com/in/notrealvitor/

UI Portfolio: layers.to/notrealvitor

Professional Summary

Tech UI Developer and Game Designer with 10+ years implementing UI systems and gameplay features. Previous years working on AAA titles including **Fortnite**, **Apex Legends**, and **DC Worlds Collide**. Deep experience with Unreal Engine and a proven ability to bridge design and technical implementation in fast-paced, large-scale development environments.

Key Achievements

- **AAA Experience:** Contributed to three major AAA titles with millions of active users
- **Ownership:** Led roadmap planning and architecture decisions for multiple projects
- **Cross-Functional Collaboration:** Proven ability to work with large international teams
- **Published Developer:** Successfully launched games on Steam and Unreal Marketplace

Core Technical Skills

UI Implementation & Programming:

Unreal Blueprints (Advanced) • Unreal UMG (Advanced) • C++ (Intermediate) • Lua (Intermediate) • C# (Intermediate) • MVVM Architecture (Advanced) • Gameplay Ability System (Intermediate)

Game Design & Documentation:

Game Design (Advanced) • Technical Documentation (Advanced) • Combat Design (Advanced) • Quest Design (Intermediate) • Game Prototyping (Intermediate) • Level Design (Intermediate) • Spreadsheets (Intermediate)

Development Tools:

Unreal Engine 5 (Advanced) • Unity (Advanced) • Perforce (Advanced) • Jira (Intermediate) • Visual Studio (Intermediate) • JetBrains Rider (Intermediate) • Google Suite (Intermediate) • VSCode (Intermediate) • Figma (Basic)

Supporting Skills:

Adobe Photoshop (Advanced) • Blender 3D (Intermediate) • Maya (Intermediate) • Adobe Suite (Intermediate) • Lucidchart (Intermediate)

Languages:

Portuguese (Native – C2) • English (Advanced – C1)

Career History

DEVILEST STUDIO, Brasília, Brazil - Netherlords (release 2026)

Aug. 2025 - Present

Solo Developer

- UMG UI architecture with MVVM view models for status, inventory, and deck-building screens.
- Reusable systems with C++ base classes, Blueprint children, and preset variants.
- Performance-conscious implementation: clean hierarchy, soft references, event-driven updates, texture and mesh optimization, async loading, profiling.
- End-to-end combat feature ownership: mesh import, rigging, animation, VFX, timeline events, and data-driven setup through GAS and data tables.
- Integration of core Unreal systems into a cohesive project: World Partition, PCG, GAS, MVVM, and Niagara working together as one pipeline.
- AI-assisted development workflows: LLMs for code review, debugging, documentation, engine version migration, and design iteration.

- Development environment ownership: self-hosted Perforce server with remote access via Cloudflare, enabling work from any location.

Tools/Technologies: Unreal Engine 5 · C++ · Perforce · Rider · Photoshop · Blender · Cascadeur · Claude

WARNER BROS SF - Globant (Remote Position)

Oct. 2024 - Jul. 2025

DC Worlds Collide Tech Combat Designer

- Implementation of character and combat features: characters, artifacts, reinforcements, skills, badges, icons, items, and status effects.
- Close collaboration with Design, Engineering, Art, FX, and UI across visuals, performance, and gameplay feel.
- Design trial challenges and combat scenarios for characters.
- Testing and debugging in VSCode.
- Contribute to tools usability and workflow improvements.
- Contribute to technical documentation with clarity and knowledge sharing.
- Develop character skills using Lua and add functions to the Main Combat Library to support new gameplay features.

Tools/Technologies: Unity · Lua · Excel · VSCode · Perforce · Slack · Jira

ELECTRONIC ARTS - Globant (Remote Position)

Apr. 2024 - May 2024

Apex Tech UI

- UI Implementation of new game mode HUD.
- Handling proprietary scripting languages.
- Bug fixing.

Tools/Technologies: Source Engine · Slack · Jira · Figma · IntelliJ · Google Docs · Perforce

EPIC GAMES - Globant (Remote Position)

Oct. 2023 - Feb. 2024

Fortnite Tech UI

- 25+ Tech UI tickets completed for bug fixes and implementations.
- Deep understanding of Unreal Engine, Blueprints and UMG.
- MVVM Framework for Unreal.
- Working with hundreds of people in an AAA title.
- Clear, simple, well-tested, bug-free, documented and performant code/blueprints.
- Extensive communication with people from related areas.
- Attending meetings with directors, leads and seniors.
- Read, debug and modify C++ code.

Tools/Technologies: Unreal Engine 5 · Photoshop · Jira · Figma · Rider · Google Docs · Lucidchart · Notion · Perforce

WALCRAFT CABINETRY, Mansfield, USA (Remote Position)

Jun. 2022 - Aug. 2023

Unreal Developer

- Roadmap in the beginning phases.
- Plan with benchmarks, flowcharts and spreadsheets.
- C4 Model documentation.
- Adapt C++ code and blueprints from existing plugins.
- Develop approved features aiming for optimization and usability.
- Clean code and design pattern principles.

Tools/Technologies: Unreal Engine 5 · Photoshop · Asana · Figma · Visual Studio · Discord · Google Docs · Lucidchart

GRUPO AZUL - VENTURE BUILDER, Maringá, Brazil (Remote Position) <i>Unreal Developer</i>	May 2022 – Nov. 2022
• Plan and develop a visual novel based on a NFT collection • Estimate a roadmap for the development phases • Elaborate benchmarks and flowcharts for game features • Programming based on design patterns. • Spreadsheet-driven dialogue system with speakers, sequencing, and branching paths. • Setting up GITLAB source control. • Building a demo prototype. • Publishing on Steam.	
<i>Tools/Technologies: Unreal Engine 5 · Microsoft Excel · Discord · Photoshop · Microsoft Word · ClickUp</i>	
ELEMENTAL GAME STUDIO, Porto Alegre, Brazil (Remote Position) <i>Quest Scripter</i>	Nov. 2021 – Dec. 2021
• Design and build player quest experience based on an existing script. • Deliver a fun, interesting and bug free experience. • Use, enhance and adapt tools. • Flowcharts of the quest events. • Manage localization spreadsheets of dialogues, objects and characters. • Fix or report any problems regarding quest assets. • Working with a team of 20+ on TortoiseSVN version control.	
<i>Tools/Technologies: Unreal Engine 4 · Photoshop · Lucidchart · Google Docs · Notion</i>	
UNREAL MARKETPLACE SELLER (Remote Position) Self-employed Unreal Developer	Jul. 2019 – Aug. 2020
• Self-Published Project • Multiplayer Programming • Combat Design • Publishing on Steam Store • Animation and Rigging • Level Design Tools • Handle and support clients online • Maintenance and update newer versions	
<i>Tools/Technologies: Unreal Engine 4</i>	
BETAGAMES GROUP, Brazil (Remote Position) <i>Unreal Developer</i>	Jul. 2020
• Clean, organized and commented code • Testing and polishing. • Understanding and handling client needs	
<i>Tools/Technologies: Unreal Engine 4</i>	
MUSEU OCEANOGRÁFICO UNIVALI, Balneário Camboriú, Brazil <i>Intern Unity Developer</i>	Feb. 2017 – Jul. 2017
• Help to establish the design goals. • Tech art support for the fish, corals, level design, boat animation. • Reworked starting and ending screens. • C# developer in the last months for polishing and bug fix.	
<i>Tools/Technologies: Unity · Blender · Photoshop · Maya · Monodevelop</i>	
TORMENTA GAMES, Brasília, Brazil	Jul. 2012 – Nov. 2012

Intern Unity Frontend Developer

- Working with a large group (around 10 people).
- Relevant discussions regarding design.
- Responsible for the menus and HUDs, including a tutorial.
- C# Programming.

Tools/Technologies: Unity 3D · Blender · Photoshop · Monodevelop

Education

Universidade do Vale do Itajaí UNIVALI, Balneário Camboriú, Brazil
BS, Game Design

Aug. 2014 – Mar. 2019

IESB, Brasília, Brazil
VT, Digital Games

Jan. 2011 – Dec. 2013
